Homework Assignment 1

1. Rewrite the Java Examples 2-3, 2-4, and 2-5 in Python and test run it in the same way as shown on Page 25 through Page 27. Type out all the commands in each step of the process, print out a screenshot of the final results in CSUEB Hadoop, and include the Python code in the Word document that you will turn in.

2. Work *Example 3-3* on CSUEB Hadoop. Type out all the commands in each step of the process and print out a screenshot of the final results in CSUEB Hadoop.

3. Work *Example 4-16* (to the last command for *index* on page 139) on CSUEB Hadoop. Type out all the commands in each step of the process and print out a screenshot of the final results in CSUEB Hadoop.

4. Test the word_count.py in Spark by using quangle.txt in Hadoop-Book-Master\input\docs as input data file. Type out all the commands in each step of the process and print out a screenshot of the final results in CSUEB Hadoop.

Below is an example of my work for *Example 3-1*

Command for compiling Java file:

javac -cp src/:hadoop-common-2.6.1.jar:hadoop-mapreduce-client-core-2.6.1.jar:commons-cli-2.0.jar -d . URLCat.java

Command for copying a file from local disk to HDFS:

hdfs dfs -copyFromLocal quangle.txt .

Command for running Java in Hadoop

hadoop URLCat hdfs:///user/hadoop/quangle.txt

Screenshot of final results in EMR:
